1. I never knew that! Describe something new you learned from this presentation.

2. I can see clearly now, the rain is gone! What key point(s) did this presentation help you understand more clearly?

3. Things are still a little muddy. Is there anything you are still unclear about that you wish had been better explained or covered more in-depth?

4. Not what I needed. What do you think could be done differently next time that would make a similar presentation more beneficial? (Too basic, too technical, too boring, not applicable, add this, delete that etc)

5. Disappointed you didn't talk about what I really wanted to know. Please list what you wanted to know that wasn't discussed.
