

Black Historical Museum & Society, Milwaukee, WI

Benefits

- Students learn in medical centers and clinics committed to providing patient-centered care and delivering the latest care management and healthcare quality initiatives in the context of a large integrated delivery system.
- Students experience healthcare in the same clinical setting across the span of the entire fourth year. Students spend one-half day per week in Family Medicine, Internal Medicine, Women's Health or other specialty areas of choice working with urban and underserved populations.
- Students gain an appreciation of the urban context, health disparities, and community resources, enhance their cultural skills, become more engaged with communities and learn how to develop and implement population-based health improvement projects.
- TRIUMPH prepares medical students to be effective clinicians and advocates to improve the health of urban populations.

TRaining In Urban Medicine and Public Health (**TRIUMPH**)

A program for medical students to promote equity in healthcare for urban populations.

University of Wisconsin
**SCHOOL OF MEDICINE
AND PUBLIC HEALTH**

Embodying the Wisconsin Idea

United Community Center, Milwaukee, WI

Walker's Point Community Clinic, Milwaukee, WI

TRIUMPH students promoting smoking cessation.

What is TRIUMPH?

The TRaining In Urban Medicine and Public Health (TRIUMPH) track is an urban health training program for University of Wisconsin School of Medicine and Public Health (UW SMPH) medical students. TRIUMPH is designed to provide a unique and challenging educational experience in Milwaukee for students committed to providing healthcare for disadvantaged, urban populations. This is a combined M3-M4 experience that blends medicine and public health.

TRIUMPH was developed in response to a shortage of physicians in urban areas of Wisconsin. The mission of the program is to recruit and train physicians to improve health outcomes in areas of need in urban Wisconsin.

Curriculum and Educational Experiences

TRIUMPH combines existing Milwaukee-based third-year Primary Care, Obstetrics/Gynecology and Internal Medicine clerkships, adds a Community Public Health Enrichment experience, and integrates a Longitudinal Preceptorship experience with fourth-year clerkships.

Beginning in 2009-10, eight UW SMPH students will spend up to 15 months in Milwaukee starting in January of their third year.

The full range of clinical experiences are provided in Milwaukee hospitals and clinics including:

- Aurora Sinai Medical Center, Aurora St. Lukes Medical Center and other teaching hospitals
- Aurora UW Medical Group and other affiliated clinics, community health centers and clinics for the uninsured

Preceptors are UW SMPH faculty who are leaders in quality care and serve diverse populations through busy clinical practices in a variety of specialties and settings.

TRIUMPH students will identify an urban health need that captivates their interest and take time each week to conduct a community health, quality improvement or research project with the assistance of faculty and community mentors.

Third Year

January	First ½ February	Second ½ February	March	April	May	June
Obstetrics & Gynecology Clerkship	Obstetrics & Gynecology	Community and Public Health Enrichment Experience (CAPHENE)	Primary Care Clerkship (PCC with urban focus)	Primary Care Clerkship (PCC with urban focus)	Internal Medicine (4 wks. in Milwaukee or vice versa)	Internal Medicine (4 wks. in Milwaukee or vice versa)
Community Health Improvement Project / Research Project						

Fourth Year

July	August to May
Community Medicine Clerkship Orientation to Longitudinal Preceptorship	Internal Medicine Sub-Internship, Required Surgery Clerkship, M4 Electives, including 8 weeks out-of-town or international clerkship experiences
Longitudinal Preceptorship (one half day per week in Family Medicine, Internal Medicine, Women's Health or other specialty area of choice)	
Community Health Improvement Project / Research Project / Presentation in May
