# McMicken Integrated Care

40 east mcmicken avenue  
OTR a.k.a. over-the-rhine

Providing medical and psychiatric  
care to individuals affected by  
homelessness

Member of National Healthcare for  
the Homeless Council

Van operating since 1987

Clinic established in 2012

Formal psychiatric services since  
2015

depression screening  
recommendation

PHQ9

---

(Fazel S, Khosla V, Doll H, Geddes J. The prevalence of mental disorders among the homeless in western countries: a systematic review and meta-regression analysis. PLoS Med 2008;5(12):e225)

# [ a little digression, regarding integrated care from the APA @ psychiatry.org ]

---

Integrated care: general term for any attempt to fully or partially **blend behavioral health services** with general and/or specialty medical services

Quality integrated care: allows your **primary care system** to **know who is not well** with their mental health, **engage patients**, and **proactively manage their care with a team** until they improve **or are referred to more intensive services**

# [ little digression, continued... ]

---

Collaborative care: a unique, evidence-based model with 5 principles:

- 1) patient-centered care team
- 2) population-based care
- 3) measurement-based outcomes
- 4) evidence-based care
- 5) accountable care

# [ key components of collaborative care ]

## 1) patient-centered care team

Care manager

Psychiatrist

Behavioral health specialist

Primary care physician

Medical assistant

# [ key components of collaborative care ]

2) population-based care: define the panel

we developed a registry of patients

---

Patient Information		Enrollment Status and Actions				Contacts				Measurements				Contact Notes and Psychiatric C	
MRN	Name	Treatment Status	Display (Hide past tx episodes or view only the most recent contact)	Tickler	Episode Number (Episode of care/tx)	Follow-up Contact Number	Date Follow-up Due	Actual Contact Dates	Type of Contact	PHQ-9 Score (Target is <5 within 5-7 months of initial elevated PHQ-9)	% Change in PHQ-9 score (Target is -50% within 5-7 months of initial elevated PHQ-9)	GAD-7 Score (Target is <10 within 5-7 months of initial elevated GAD-7)	% Change in GAD-7 score (Target is -50% within 10 weeks of tx initiation or change)	Care Manager Contact Notes and Flag for Psychiatric Case Review (Include notes about appointment reminder or referrals to specialty services, etc.)

PRE-INTERVENTION

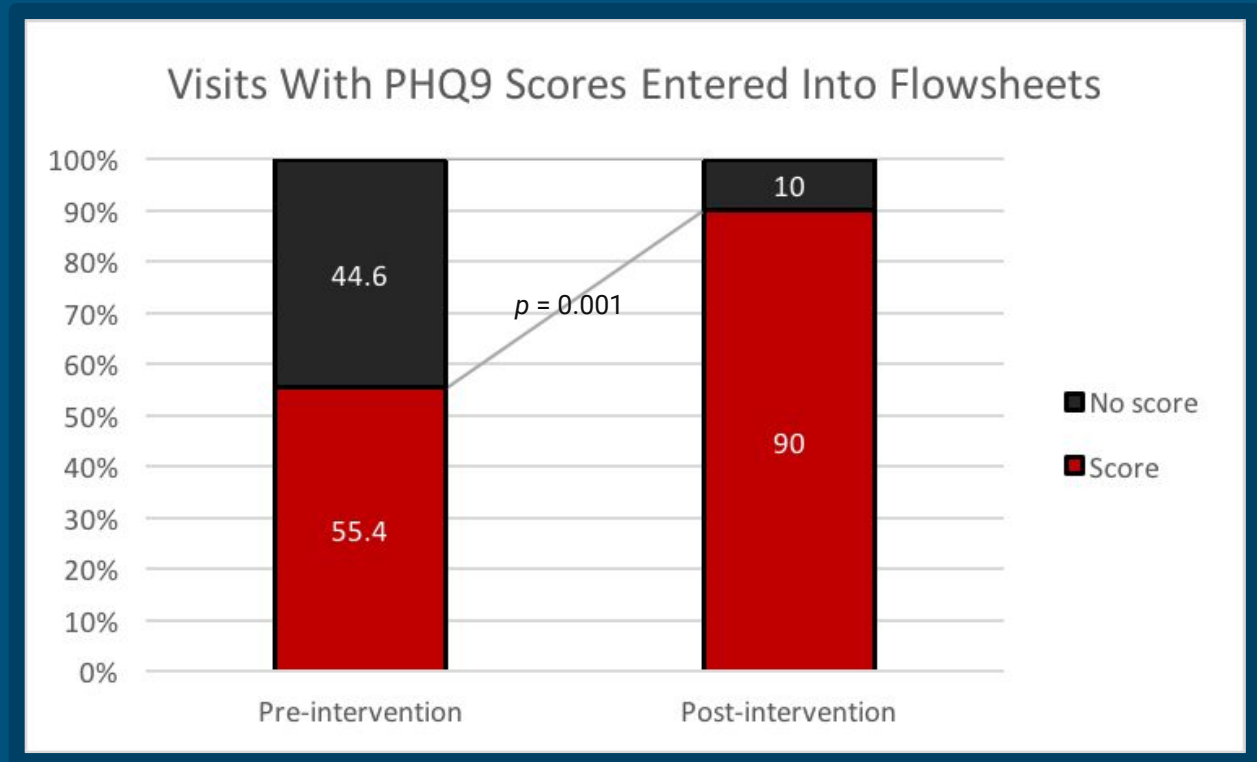

POST-INTERVENTION

post-intervention

02.28.2017 - 04.04.2017

there WAS a difference: chi-squared,  $p = 0.001$

“thanks Harini & Fabiano & Dr. Chris White”

PRE-INTERVENTION

POST-INTERVENTION

ONE YEAR FOLLOW-UP

■ No Score Available  
■ Score Available

one-year follow-up

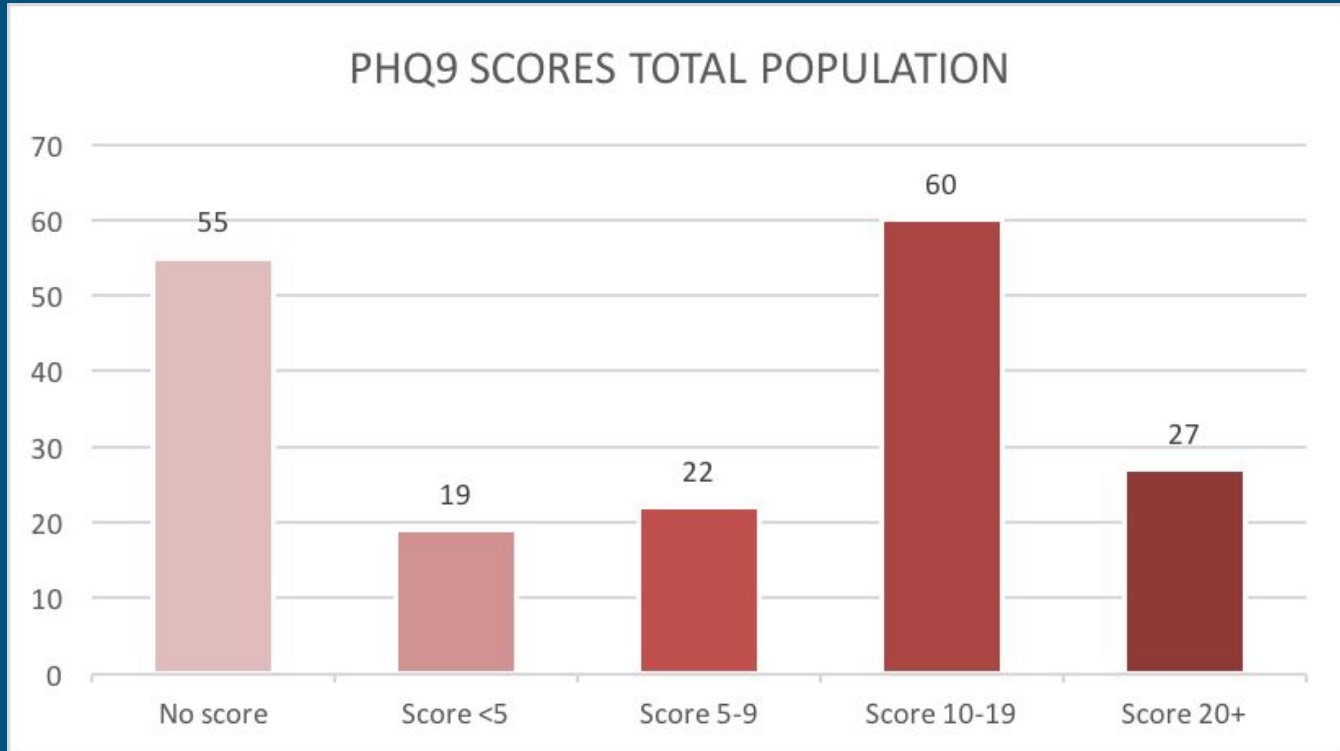

08.22.2017 - 04.03.2018

4) evidence-based care

\_\_\_\_\_ [ ... next QI project ]

# PHQ9 scores of our patients

# Limitations

---

Duration of data acquisition - “snapshot”

Seasonal component - autumn & winter vs. spring

Normal population assumption - possible bias

Incorrect data scoring - validity
