

Please answer the following questions after you have completed the **two required patient community determinants of health surveys**. Your team should answer the following questions together and submit them in a single word document in the Team Assignment link in Blackboard. This assignment is due within 2 weeks of your clinical site visit. Late assignments will be given a grade of 0 for the entire Team. Please do not submit any information that would identify the patient. (Avoid names, DOB, Date/Time seen in Clinic, or Health Care Provider)

1. List the Clinical Site(s) where you completed your patient SDOH screen(s) and Interprofessional Observation of patient care?
2. Describe one of the patient's health care goals and their perceived barriers to achieving that goal.
3. Based on the responses to the SDOH screen what does your team perceive as the main issue(s) for this patient, family, or neighborhood? Is this in alignment with the patient's perceived barrier(s) to achieving that goal?
4. Describe at least one issue that appears to have the greatest impact on the health of the patient and our community.
5. As a team, develop a plan to address at least one potentially modifiable barrier or other aspect of delivering optimal health care for this patient population as determined by your SDOH screen. This should be supported by evidence. Resources should be included and cited using APA 6<sup>th</sup> edition format.
6. Please refer to grading rubric, *Team Assignment*, for details on specific expectations of the assignment for successful completion.
