

## Rio Bravo Global Health Lecture Series

*The mission of the Rio Bravo Family Medicine Global Health Track is to train family physicians to be intercultural health-care leaders, advocates and facilitators, both locally and internationally.*

Thank you for your interest in helping support the Rio Bravo Global Health Track. Your participation is greatly appreciated and we look forward to your ongoing assistance in helping all of us become more globally aware.

I am asking that presenters review the AAFP Reprint No. 287. Your presentation should address at least one of the points in either the Competencies, Attitudes and Behaviors, Knowledge, or Skills.

Before you give your talk please send Dr. Burket the outline or presentation with the point(s) that will be included in your presentation.

Again, thank you for your help and look forward to our future endeavors together!

Brent
