

## **Cystic Fibrosis Testing and the New Eugenics Discussion Questions**

**Discuss question one after the two Gattica clips. Participants should review the questions before viewing the clips:**

1. Did you find any of the themes in the two clips we watched disturbing or unsettling? If so, why?

**Discuss questions 2-4 after the overview of cystic fibrosis.**

2. After the discussion of the history of the old eugenics and the new eugenics movement, what aspects of prenatal CF testing, do you believe are eugenic in nature?

3. Do you see any other potentially problematic issues regarding prenatal CF testing?

4. Given the history of the eugenics movement and the harm it caused, and given the recent trends in genetic testing, what are some of the implications for society? Are there any possible problems to the trends?
