

Differentiating Problems with Clinical Reasoning

Medical Knowledge

Low exams and low information

Clinical Skills

Lacks 'know how' for exam & procedures

Time Management and Organization

Unprepared, disorganized, behind, out of sync

Clinical Reasoning

Extraneous information / Lack of pertinents

Difficulty individualizing treatment

Difficulty setting priorities in Differential Diagnosis

Frequent difficulty in ruling out 'Can't Miss' diagnosis

Interpersonal Skills

Awkward, poor teamwork, and misreading of social cues

Communication

Difficulty with questions, explanations, and teaching patients

Professionalism

Lack of conscientiousness, dishonest, shirks responsibility

Practice Based Learning and Improvement

Lack of reflection, reading, and continuous efforts to improve

Systems Based Practice

Does not value context & systems of health

Mental Well-Being

Wide variety of presentations, inconsistent performance
